The low odour
natural stone silicone

Quality creates cohesion

- ✓ **Low odour**
- ✓ No migratory staining
- ✓ Very long-lasting joint
- ✓ Resistant to mould

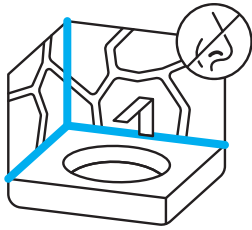

Index: 9999714-GB | 11.01.2024 | © Hermann Otto GmbH 2024

Convenient to work

1-component silicone sealant based on alkoxy, neutral cross-linking

indoor and outdoor

The low odour natural stone silicone

OTTOSEAL® S 80 is now easier to smooth and, as usual, doesn't cause any marginal staining when sealing and jointing marble and different types of natural stone, such as sandstone, quartzite, granite, gneiss or porphyry. Thanks to the very good weathering, ageing and UV-resistance, as well as being equipped with fungicide, OTTOSEAL® S 80 ensures long-lasting joints, both indoors and outdoors. OTTOSEAL® S 80 is also available in matte and matte sanded colour tones. Thanks to the ISEGA clearance certificate, OTTOSEAL® S 80 has been tested and approved for use in the food-related sector and is therefore perfect for these applications. Attention: To smooth, we recommend the special OTTO natural stone smoothing agent.

Always achieve the right colour

As a special feature, matte and matte sanded colours are also available. To make the colour selection as simple as possible, OTTO offers high quality and practical colour charts with original colour patterns.

Low odour

No migratory staining

Very long-lasting joint

Resistant to mould
