OTTO Spray primer

The contact adhesive for installing the window tape

Contact adhesive for the pre-treatment of wall reveal

For indoor and outdoor application

SPRÜHPR

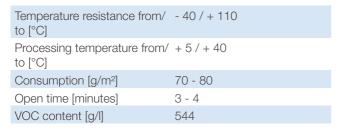

Characteristics

- Spray primer or contact adhesive with high adhesive strength
- > Fast-drying
- > Universally usable

Fields of application

- > Pre-treatment of the wall reveal for the OTTO window tapes
- > Bonding of EPDM rails

Technical properties

These data are not suitable for the issue of specifications. Please contact OTTO-CHEMIE before issuing specifications.

Pretreatment

The reveal must be cleaned of dirt and mortar residues

Important information

The materials to be bonded must be dry and free of dust and grease. Then spray theprimer onto the surfaces to be bonded. A distance of 30 cm is ideal. The adhesive sheets should preferably be applied without overlap. After 2 - 4 minutes, press or roll the two surfaces firmly together. For overlapping application, at least double the open time of 3 - 4 minutes. In the case of a very porous substrate, check whether there is sufficient contact between the two adhesive layers. If necessary, spray on anadditional layer.

If necessary, protect adjacent areas from undesired primer application.

Application information

Due to the many possible influences during and after application, the customer always has to carry out trials first. Please observe the recommended shelf life which is printed on the packaging.

Packaging

Container	Order unit (OU)	Packaging unit (PU)	Order code
500 ml aerosol can	1 piece	12 pieces	SPRÜHPR83
