

Concentrated smoothing agent

Technical Datasheet

- Characteristics:
- Aqueous solution of surface-active substances
 - Suspension – homogenise before use
 - **Gentle on the skin due to dermatologically tested active ingredients**
 - Does not dry out the skin
 - **Concentrated, can be diluted with water individually depending on the sealant and use**
 - Keeps the shine of the sealant surface intact
 - Colouring pigments of the sealant are not washed off
 - **Not suitable for marble and other natural stones**

- Fields of application:
- Smoothing of sealant surfaces including silicone, polyurethane and MS hybrid polymer sealants

Technical properties:	Storage temperature from/to [°C]	0 / + 25
	Shelf life at 23 °C/50 % RH [months]	12 (1)

1) Frost-free storage

- Application information:
- For applications in combination with marble and other natural stones we recommend OTTO Marble Silicone Smoothing Agent.
- Shake bottles and canisters well before use to homogenise the smoothing agent.
- Mix up smoothing agents in drums with a clean mixing tool before use to homogenise it.
- Use fresh smoothing agent always and apply it economically always. If necessary, dilute the smoothing agent with water.
- As a matter of principle it is advisable to use the smoothing agent as sparingly as possible, for example by only slightly moistening the smoothing tools or applying the smoothing agent directly to the surface of the sealant with a clean paintbrush.
- Smoothing agent must not remain on the sealant joint and on adjacent surfaces, because dried residual sealant might cause optical impairments (dull/light spots).
- Residual smoothing agent must be removed using clear water before it dries.
- The greater the dilution, the stronger the tendency towards matt, light residues (recommendation for the dilution ratio 1 part concentrate: 3 parts water).
- Please check compatibility to adjacent surfaces, e.g. coated wood, before use by making preliminary tests.
- The 5-litre canisters are equipped with the "Anti-bubble system".
- Due to the many possible influences during and after application, the customer always has to carry out trials first.
- Please observe the recommended shelf life which is printed on the packaging.

Packaging:	1,000 ml plastic bottle	5 l plastic canister
-	GLK-57	GLK-59
Packaging unit	1	1
Pieces per pallet	-	90

Other packagings on request.

Safety precautions: Please observe the material safety data sheet.

Disposal: Information about disposal: Please refer to the material safety data sheet.

Warranty information: All information in this publication is based on our current technical knowledge and experience. However, since conditions and methods of use and application of our products are beyond our control, we suggest that you test the product before final use. Information given in this technical data sheet and explanations of OTTO-CHEMIE in connection with this technical data sheet (e.g. service description, reference to DIN regulations etc.) is not to be seen as a warranty. Warranties require a separate written declaration of OTTO-CHEMIE to prove their validity. The characteristics stated in this data sheet define the characteristics of the article broadly and conclusively. Suggestions of use are not to be taken as confirmation of the appropriateness for the recommended intended use. We reserve the right to alter the product, adjusting it according to technical progress and new developments. We are at your disposal both for inquiries as well as specific application problems. If a governmental approval or clearance is necessary for the application of our products, the user is responsible for the obtainment of such. Our recommendations do not excuse the user from the obligation to take into consideration the possibility of infringement of third parties' rights and - if necessary - resolving it. For the rest our general terms and conditions apply, in particular regarding a possible liability for defects. You can find our general terms and conditions on our homepage: <http://www.otto-chemie.de/en/terms-and-conditions>
